CUTTERBAR MOWER FOR HOME USE

Configured for a centrally mounted cutterbar, this lightweight and manoeuvrable machine is designed to meet the requirements of non-professional users. The machine is primarily used to cut grass and fodder crops and for general clearing duties outside the garden. A range of features, including the height adjustable handlebars, transmission with oil bath gearbox and the extremely ergonomic layout of the controls, reflect the high level of attention paid to the operator.

Main features:

- 92 cm centrally mounted cutterbar with special teeth and cam drive.
- Rugged oil-bath gearbox with aluminium case and gears with worm screw to ensure the maximum working life.
- Vertically adjustable handlebars so the machine can be adapted to suite the operator's posture.
- On/off control integrated in the handgrip along with the accelerator lever for maximum accessibility and convenience.
- QuickFit coupling device for connecting accessories.
